WORK EXPERIENCE

FREELANCER | JAN 2020

Working as Freelance Frontend Developer across a wide range of clients and industries to hone my skills as a junior developer .

Some of clients/projects that I have worked on:

- **Sharp Europe** : Build, Updating and adding new features to their "Future of Work" micro site using best practices and SEO code through the use of HTML5, SASS and modern JavaScript via GitHub version control.
- **AstraZeneca** : Working with a team of developers to build new features and provide support in adding interactive SVG maps to one of their web apps used by thousands of users.
- **Lyxor ETF** : Build of Web Banners for multiple European campaigns, these web banners where created and crafted by hand from storyboards in Sketch app to maximise interactivity and image quality of end product.
- **Caffe Nero** : Update and build of new features to their marketing website, creating/updating highly configurable and dynamic pages. **URL:**<https://caffenero.com/>
- **EveryFriday** : Updates to codebase and build of new features to their marketing website that would allow the client to create beautiful pages using WordPress content editor.
URL:<https://www.everyfriday.studio/>

Also worked alongside London agencies such as We Are Collider (<https://wearecollider.com/>) and, on some of the projects mentioned above and worked with small business in London area using technologies/frameworks such as React, Gatsby, Shopify(API), CommerceJS(API)..

EDUCATION

FRONTEND/UI DEVELOPER

NOVEMBER 2019

Started my journey by attending to one of the Harvard CS50 edx courses. (CS50's Introduction to Computer Science) and lately (CS50's Web Programming with Python and JavaScript) still learning from reading books, YouTube, skillShare, Udemy.
